ASK A FOODIE

Did you know that the FOODIES at Leon's are really into local produce? In fact, we are so passionate about eating locally grown fresh foods “in season” that when sweet corn season hits in Nebraska almost all we can think about is FRESH PICKED bi-color sweet corn from Naber's Produce!

Nabers Produce near York, NE has some of the best tasting sweet corn due to the unique way they hydro cool it. When the corn is first picked it is immediately chilled with 42 degree water to quickly remove field heat from the ears of sweet corn as soon as possible. After a 30-to-45-minute shower in this chilled water, the corn goes into a refrigerated storage room and is held at 36 degrees to preserve its natural sugars.

Keeping the corn cool longer ensures both freshness and the sweet flavor because at low temperatures the sugars inside the corn can't break down into starch. During the summer corn is delivered daily to Leon's so you can be sure it is always at the peak of freshness and that is just another reason why some days being average just isn't good enough, that's when you come to
